A3: Interface Presentation – Marking Document

The interface presentation is designed for your group to demonstrate the current version[s] of the front(back)-end[s] of your product/solution. Your group has 5 – 8 minutes to give a walkthrough of the design. This presentation can use PowerPoint (for showing screen-shots), but it is preferred that your group can demonstrate the real prototype interfaces.

Project	
Group Members	

Element	Good	Pass	Poor
- Main Interface Design Features (single pages, patterns, design elements, colours)	- Professional discussion of the product/solution design features and why they were chosen. - Discussion throughout on why appropriate to the target audience.	- Clear discussion of the product/solution design features and why they were chosen.	- Limited discussion of the product/solution design features.
- Screen Flow (Storyboard)	- Professional discussion of the flow between different parts of the system.	- Some understanding and knowledge of the flow.	- Limited or brief discussion of flow within the system.
Has the design been approved by the supervisor/client?	Yes / No		
- Consideration of Standards (e.g. accessibility, security) **- Consideration of any HIGs of the Deployment Environment**			
- Overall Interface Design Impression	- Overall a professional design. - Professionally uses current design trends and methods.	- Overall a clear design. - Improvements should be made to the final design.	- Basic design. - Major improvements needed to the final design.
- Oral Communication Skills **- Clarity of Presentation** **- Speakers Look Professional**	- Overall a professional presentation.	- Overall a clear presentation.	- Issues during the presentation, e.g. group members not having a clear order of involvement.
